Professional Summary

After graduating from Agricultural faculty in Novi Sad and realizing that the decent job is nearly impossible to find, I decided to learn programming and join the fastest growing industry in the country. I started with Front End Development, while learning Java on the side since that is my end goal. Right now, I am self educated programmer with firm grasp of Front End Development tools and techniques and good knowledge of Java OO concepts and logic. Eager to learn, explore and improve myself in a challenging and dynamic environment.

As a beginner programmer with good understanding of object-oriented programming and big desire to expand my knowledge, I feel confident that together we can achieve our goals and reach the next level of success. I offer my knowledge, modest as it is, and a strong aptitude for learning new technologies, techniques and skills needed to be a good asset to your company. My most notable skills include:

- **Communication Skills:** I am comfortable communicating with technical and non-technical employees throughout the company in order to complete projects and achieve organizational goals.
- **Fast Learner:** I adapt to new concepts and situations quickly, am able to embrace new ideas and methods, and enjoy learning new things and can assimilate new ideas.
- **Teamwork and collaboration:** Working with others on a common task, taking actions which respect the needs and contributions of others, contributing to and accepting the consensus, negotiating a win-win solution to achieve the objectives of the team.

Overall, I feel that my knowledge as a programmer and my passion for new technologies makes me the ideal candidate to meet your development needs. I'd be glad to discuss my abilities and background with you in more detail. Thank you for your time and consideration.

Sincerely,

Nenad Nikolić
